

Pabolu Vineeth

Software Developer

harivineeth51@gmail.com — +91 91007 33701 — LinkedIn — GitHub

Professional Summary

Computer Science graduate with hands-on experience in Python development, REST API integration, databases, data analytics, and IOT systems. Experienced in building web applications, analytical dashboards, and data-driven solutions using Python, SQL, Power BI, and modern development tools.

Education

B.Tech in Computer Science and Engineering

SRM Institute of Science and Technology, Kattankulathur

2022 – 2026

CGPA: 8.58/10

Intermediate – MPC

Vidya Junior College, Chirala

2020 – 2022

82.1%

Experience

Data Science Intern, Zidio Development

Apr 2024 – May 2024

- Analyzed 10 years of historical weather data across 5 regions using Python (Pandas, NumPy) to identify seasonal patterns, improving prediction accuracy by 15%.
- Built and validated 3 prediction models in Google Colab, cutting manual analysis time by 6 hours per week versus the prior workflow.

Projects

Smart Result Management System

Python, Tkinter, SQLite, bcrypt

- Built a desktop application managing results for 500+ students with role-based access for Faculty and Students, cutting result-processing time by 60% versus manual methods.
- Secured authentication for 20+ faculty accounts using bcrypt hashing, eliminating unauthorized result edits across all test cases.
- Integrated SQLite for database management, reducing manual data-entry effort by 70% across 1,000+ student records.

Weather Forecast Web Application

HTML, CSS, JavaScript, OpenWeatherMap API

- Built a responsive web application fetching live data from the OpenWeatherMap API for 200+ cities, rendering updates in under 2 seconds.
- Implemented asynchronous API calls, reducing interface update/load time by 40% versus synchronous requests.

Banking Data Analysis Dashboard

Power BI, Excel

- Built a Power BI dashboard analyzing 5,000+ customer transactions across 8 fee categories to surface engagement trends.
- Cleaned and transformed 10,000+ rows of banking data in Excel, reducing data inconsistencies by 25% and enabling faster trend reporting.

Technical Skills

Languages: Python, C, C++, Java

Web Development: HTML, CSS, REST APIs

Frameworks: Flask, FastAPI, Tkinter

Databases: MySQL, SQLite

AI/ML: TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, OpenCV

Data & Analytics: Excel, Power BI, Tableau

IoT/Embedded: Arduino, ESP8266, Raspberry Pi, MPU6050

Developer Tools: Git, GitHub, VS Code, Postman, Processing IDE

AI Tools: ChatGPT, Claude, OpenCode, Codex, Antigravity

Core: Object-Oriented Programming, API Integration, System Design

Certifications

Database Management – Scaler

Introduction to Data Science – Cisco Networking Academy

Full Stack Web Development – Udemy

Additional Experience

Photographer, DSA Media Club

2023 – 2025

- Covered campus events and produced media used for branding and digital promotions.
- Collaborated with media, design, and PR teams while managing multiple assignments under strict timelines.
